

CREATE A SHELL SCRIPT IN LINUX

```
pravalika18@d73d6822db255ef:~  
pravalika18@d73d6822db255ef:~$ touch script.sh  
pravalika18@d73d6822db255ef:~$ chmod +x script.sh  
pravalika18@d73d6822db255ef:~$ cat script.sh  
echo This is my first shell script  
touch testfile  
ls  
echo this the end of my shell script  
#This is a comment  
echo testing comments in shell script  
pravalika18@d73d6822db255ef:~$ ./script.sh  
This is my first shell script  
script.sh script1.sh script2.sh testfile  
this the end of my shell script  
testing comments in shell script  
pravalika18@d73d6822db255ef:~$
```
